

# **INT Blockchain Explorer Guide**

2018.11

Use INT explorer at <https://test.explorer.intchain.io>.

## Query a block

On the "Blockchain-Blocks" page we can view information about all blocks, including block height, timestamp, transactions, miner address, total fee and average fee. At the same time, we can also use the search bar to check block information by searching for the block height and hash of a specific block.

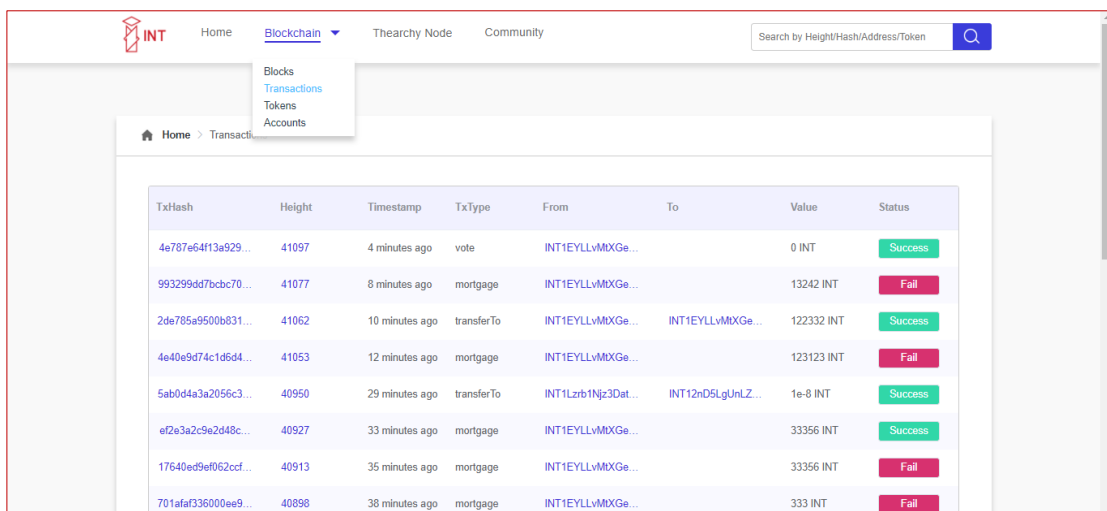

The screenshot shows the INT Blockchain-Blocks page. The top navigation bar includes Home, Blockchain (selected), Thearchy Node, and Community. A search bar is located on the right. A dropdown menu for Blockchain shows options: Blocks, Transactions, Tokens, and Accounts. The main content area displays a table of blocks.

## Query a transaction

On the "Blockchain-Transactions" page we can view all transaction information, including transaction hash, block height, timestamp, transaction type, payment address, beneficiary address and transaction status. There are three types of trading status, "success", "fail", and "pending". We can also use the search bar to check transaction information by searching for a specific transaction hash.

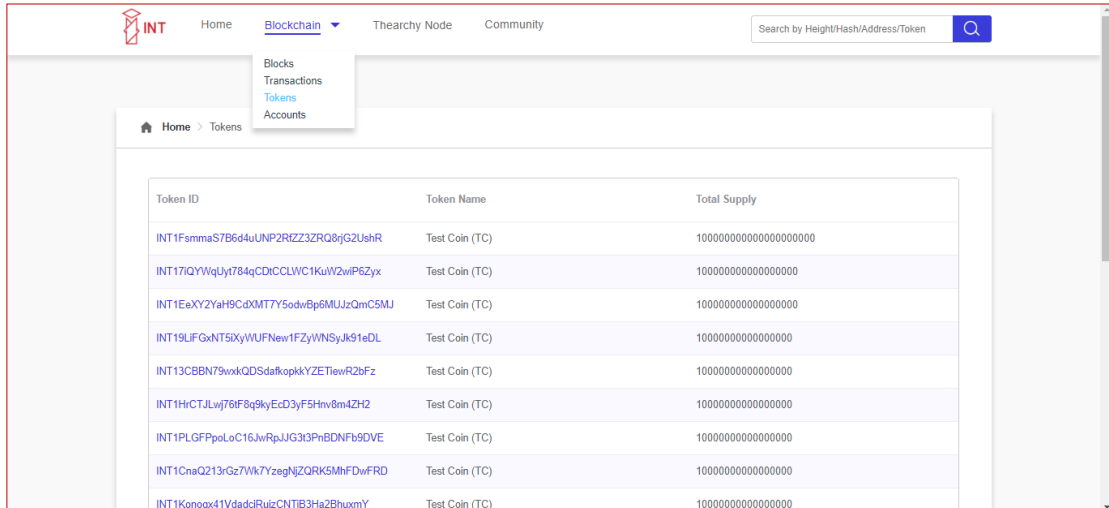

The screenshot shows the INT Blockchain-Transactions page. The top navigation bar is the same as the previous screenshot. The dropdown menu for Blockchain shows options: Blocks, Transactions (selected), Tokens, and Accounts. The main content area displays a table of transactions.

## Query a token

On the “Blockchain-Tokens” page we can view all token information issued on INT Chain, including the token ID, token name and total supply. We can also use the search bar to check token information by searching a specific Token ID.

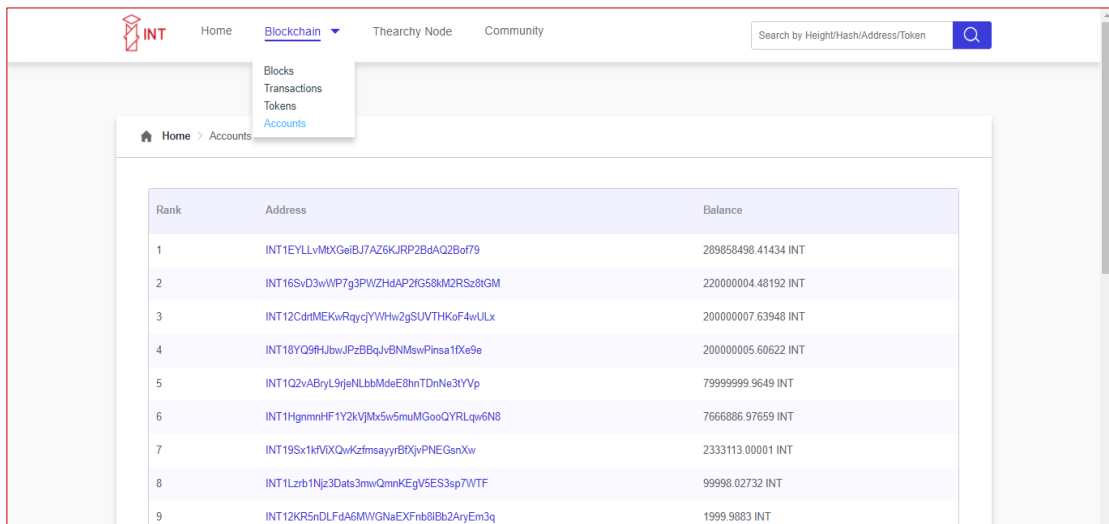

The screenshot shows the INT Blockchain-Tokens page. The navigation bar includes Home, Blockchain (selected), Thearchy Node, and Community. A search bar is located at the top right. A dropdown menu for Blockchain shows Blocks, Transactions, Tokens (selected), and Accounts. The main content area displays a table of tokens.

## Query an account

On the “Blockchain-Accounts” page we can view all account information who is holding INT, including rank, address and balance. We can also use the search bar to check account information by searching for a specific account address.

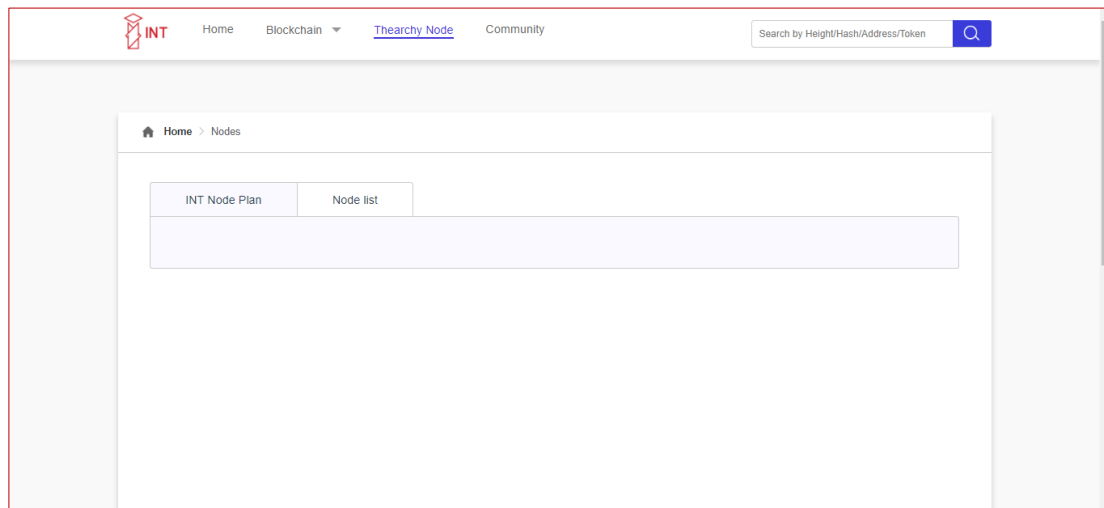

The screenshot shows the INT Blockchain-Accounts page. The navigation bar includes Home, Blockchain (selected), Thearchy Node, and Community. A search bar is located at the top right. A dropdown menu for Blockchain shows Blocks, Transactions, Tokens, and Accounts (selected). The main content area displays a table of accounts.

## About node

On the “Thearchy Node” page we can view the upcoming INT Node Plan and the node list in the current round of voting, which will be updated per minute. The node list is for checking only, not voting. Voting can only be done in the INT official wallet. The Thearchy Nodes are responsible for block generation and synchronizing the data, and will get corresponding rewards.

For any questions regarding the use of the INT blockchain explorer, please let us know by using the contact link at the bottom of the website.
